## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, 19-27, and 42 drawn to a gene encoding a protein, a recombinant vector, transgenic plant or a method of imparting salt stress in a plant comprising said gene.

Group II, claim(s) 12-17, 28-33 and 35-41 drawn to a selection marker for a transgenic plant.

Group III, claim(s) 18, 34 and 43 drawn to a method for selecting a transgenic plant.

The inventions listed as Group I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding technical features for the following reasons:

The technical feature linking Groups I-III appear to be a DNA sequence encoding an UDP-glucose-4-epimerase. However, Town et al. (NCBI, GenBank, Sequence Accession No. NM\_101148, Published August 20, 2002) teach a nucleotide sequence encoding a protein of uridine diphosphate glucose epimerase.

Therefore, the technical feature linking the inventions of Groups I-III does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art. It is important to note that claims 1 and 2, parts b) – c) read on any UDP-glucose-4-epimerase which inherently possesses enzymatic activity.

Accordingly, Groups I-III are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
